PROJECTS & EXPERIENCE

Portfolio Webiste

Personal Project | 2024 - Present

- Build my own portfolio website using NextJs, tailwindcss, framer motion and other 3rd party libraries.
- While developing I faced several problems and fixed numerous issues and handled all the debugging.
- It uses git for version control and deployment changes. My portfolio is live, hosted via Vercel, that made me understand the process of deployment and how to manage your projects.

Photography Portfolio Website

Personal Project | 03/2024 - 04/2024

- I built a portfolio website using NextJs, tailwindcss, framer motion and other 3rd party libraries for a photographer friend who wanted to showcase his work.
- The portfolio is live,also hosted via Vercel, It features a contact that lets the simple website to connect him to his clients via emails.

Front-End Developer

Warsaw, Poland | 2024

- I joined a hackathon and worked as a front-end developer for our team.
- Conducted research and prepared reports on various topics related to the projects and produced data sets.
- Followed several protocols for proper project management and worked as an QA for code review and optimization.
- Helped teammates with constructive feedbacks and moral support.
