PROJECTS

Expense Tracking Web-App
Personal • 11/2023 - 12/2023

Built the app from scratch using React.Js, Framer Motion, Styled components, and CSS for the front end, and Node.js, and express.js for Backend. It uses GIT for version control. It is my first Application based project aimed at people living alone or, abroad, whoever needs to manage their expenses.

Portfolio Website
Personal • 10/2022 - 11/2023

Build my portfolio website using basic HTML/CSS, and JavaScript. While developing I faced several problems and fixed numerous issues and handled all the debugging.
First-time experience of building a website on my own.
